

Information evenings

Wednesdays from 5.45-8.00pm
15 February, 14 March, 25 April 2012

For parents and guardians

Parents or guardians have an important role to play in their son or daughter's progression to university. They will no doubt want to be sure that they are making the right choice for their future.

To equip them with the facts, we are offering a series of information evenings covering the areas specifically of interest to parents and guardians.

The evenings begin with an introduction to Teesside University, including an overview of the courses available, alternative routes into higher education and the fantastic facilities on campus. This is followed by a chance to hear first-hand from a recent Teesside graduate, who will give their perspective on university life and the benefits of higher education.

We will also address some of the myths around the employability of graduates and guide parents through the application process and personal statement writing. The evening will end with a comprehensive presentation on student finance and scholarships, delivered by our Student Services department.

Please can you make the parents of your students aware of these evenings. Similarly, we are happy to attend any parents events you are having.

For more information email
enquiries@tees.ac.uk or call 01642 342275.
